

**MADE IN DENMARK**

**MAXIMIZED  
SAFETY  
WHEN INFLATING  
WHEELS**

IT 1000 mounted with 2 safety gates, extension tables, rollout drop and Omega Jet System.

## NEW IMPROVED INFLATION STATION

IT 1000 is our new streamlined inflation station for the safe inflation of wheels.

IT 1000 is constructed as a basic model with a PCI 1200 computer inflator. IT 1000 can be mounted with different kinds of optional equipment. This way you can have an inflation station with exactly the features and functions you need.

The safety offered by using IT 1000 is improved compared to our former models of inflation stations, and the design has been streamlined.

### FEATURES

- High level of safety when inflating wheels
- Bigger window on the front for an improved view
- Polycarbonate glass is mounted with a heavy glue for a good durability
- Stronger construction and a wider portal = improved safety
- Incl. PCI 1200 computer inflator, which is nicely integrated on the front
- Can be mounted with different kinds of optional equipment (see below and on page 2)
